Summary

Dynamic and experienced Product Owner with over 8 years of experience in the IT product domain, specializing in tailor software development and API integrations. Certified Scrum Product Owner with a strong background in project management, technical documentation, and ensuring seamless partner onboarding.

Experience

Senior Business Analyst

BRAC IT, ***July 2024 - Present***

• Directed requirements design for a microfinance field-operations platform deployed as independent instances across 6 African markets, adapting specifications to each country's distinct operational model.
• Managed two major pilots and a full rollout — driving one pilot to 72% digital transaction processing, cutting loan processing time from 1 week to 1–2 days, and reducing printing costs by 55%
• Owned business requirements for a proprietary ERP integration with a global bank, covering loan disbursement, reconciliation, and collection workflows — reducing manual processing time from ~1 week to 24 hours.
• Established requirements governance frameworks, reducing rework by 35% and measurably improving release quality across delivery cycles.
• Leading 2 Business Analysts, improving execution speed and delivery outcomes across concurrent workstreams.

Business Consultant

SELISE Digitial Platforms, ***August 2021 - June 2024***

Amberg Track Pro (July 2021 – June 2024)
• Part of the core team from Sprint 1, contributing to the complete product lifecycle of a railway inspection desktop application for Amberg Technologies.
• Defined workflows and user stories for a chromium-based app installer, built using Advanced Installer bundling Erlang OTP, RabbitMQ, .NET (Kestrel), Redis, Node.js, and MongoDB, ensuring EN-13848 standard compliance for rail inspection.

CMS for SV Group (Europe-wide Restaurant Chain - July 2022 – June 2023)
• Led business analysis for a centralized Content Management System (CMS) to manage content (menus, images) for 100+ restaurant outlets across Europe.
• Designed role-based permission matrices for marketing managers, branch managers, and editors.
• Enabled real-time microsite generation and deployment for individual outlets from the CMS.

SV OTW – Sustainability Management Tool (October 2022 – January 2023)
• Analyzed and designed an internal web-based tool to track and evaluate daily food purchases and wastage across outlets.
• Enabled branches to log activities and generate sustainability reports aligned with SV's corporate responsibility goals.

Experience (contd.)

Toffee Star Search – Banglalink OTT Platform (May 2022 - July 2022)

• Gathered and documented requirements for the Toffee Star Search microsite, supporting Banglalink's entry into the UGC space.
• Delivered support for multilingual content, SEO optimization, and leaderboard integration

Repair Management Platform – Service7000 AG (December 2022 – June 2024)

• Spearheaded business analysis for a repair and service request management system for tenants, caretakers, and apartment owners
• Evaluated and optimized a non-scalable route optimization algorithm (originally developed by a university faculty) to support real-world deployment for scalable multi-route scheduling.
• Worked with developers to re-engineer the algorithm, significantly improving efficiency.

Project Consultant

Field Information Solutions Ltd., ***April 2020 - July 2021***

• Responsible for development of features for a **Mobile app** and **Web application** that ensures last mile distribution.
• Identify potential customers and facilitate the onboarding process for a seamless experience.
• Communicated with end users to identify pain points and collect feedback to ideate new features and evaluate priorities of upcoming backlog items.
• Brainstormed new features by analyzing needs of various customer segments to find ways to widen user base.
• Groomed product backlog to ensure user stories are complete and ready to be incorporated in sprints.
• Conducted acceptance testing to validate features have met their acceptance criteria.

Sales Coordinator

AKS Khan pharma Ltd.(A retail model pharma chain), ***May 2018 - March 2020***

• Analyzed multiple product portfolios by evaluating growth trends, breaking down overhead costs, and examining the revenue generated for each product to identify profitability for products or categories.
• Monitored 13 outlet's operations all across Bangladesh consisting 150+ employees to identify prospective opportunities and pain points in order to optimize customer experience and service quality.
• Coordinated activities for better customer tracking to identify service turnarounds rates, onboarding rates, and percentage of recurring customers to identify the performances of product segments.
